### MESSAGE

Dear Colleagues

Globally, COVID-19 has spread to more than 200 countries and has impacted several lives across the globe. India has also not remained unaffected. While our Government is taking stringent actions to contain the spread of COVID-19, including imposition of a nation-wide lockdown, it is also critical for each one of us to follow the protocols and take necessary measures and precautions to break the chain of transmission of the disease.

As part of COVID-19 mitigation efforts, the Government of India has issued several guidelines and advisories for assistance of the States, citizens and other stakeholders. A number of guidelines focusing on prevention, treatment, quarantine, isolation, testing strategy and inclusion of private laboratories, social distancing and lockdown have been issued by various Ministries and Departments.

To assist my esteemed senior colleagues in the Government, I have got compiled a compendium of such guidelines and advisories in a user-friendly format. This can be used on mobile phones, laptops and desktops.

To access the abridged contents of a subject from the index, the user may select ('click') the title of the said subject in the index. In case the user wants to access the actual text of guidelines/advisories/orders on the subject, a link to the source document has been provided at the bottom of abridged contents about the subject. On selecting ('clicking') on the 'source' hyperlink, the user will be able to retrieve the complete text of the document from the website.

A copy of the Compendium is attached herewith for your information and reference.

With warm regards,

  
(Dr. Harsh Vardhan)

## **Containment Plan for Large Outbreaks: Novel Corona Virus Disease 2019 (COVID-19)**

In alignment with strategic approach, this document provides action that needs to be taken for containing a large outbreak. The actions for mitigation phase will be dealt separately under a mitigation plan. The objective of this plan is to stop the chain of transmission thus reducing the morbidity and mortal

The document broadly include geographic quarantine & its action plan; Surveillance; Laboratory support; Hospital care; Clinical management; Psychosocial support; Pharmaceutical interventions; Non-Pharmaceutical interventions; Material Logistics; Risk communication; Information Management; Capacity building; Financing of containment operations; Scaling down of operations in larger outbreak of COVID-19.

[Source 01: Ministry of Health and family welfare](#)

### **Social Stigma Associated with COVID-19**

Public health emergencies during outbreak of communicable diseases may cause fear and anxiety leading to prejudices against people and communities, social isolation and stigma. Such behavior may culminate into increased hostility, chaos and unnecessary social disruptions.

Cases have been reported of people affected with COVID-19 as well as healthcare workers, sanitary workers and police, who are in the frontline for management of the outbreak, facing discrimination on account of heightened fear and misinformation about infection.

There is an urgent need to counter such prejudices and to rise as a community that is empowered with health literacy and responds appropriately in the face of this adversity. Accordingly, all responsible citizens are advised to understand and follow the guidelines.

[Source 02: Ministry of Health & Family Welfare on 8<sup>th</sup> April 2020](#)

### **Guidelines for Dialysis with reference to COVID 19 Infection**

Chronic kidney disease stage-5 (CKD-5) patients on dialysis [maintenance hemodialysis (MHD) or continuous ambulatory peritoneal dialysis (CAPD)] are also vulnerable group because of their existing comorbidities, repeated unavoidable exposure to hospital environment and immunosuppressed state due to CKD-5. These patients are therefore not only more prone to acquire infection but also develop severe diseases as compared to general population.

Patients on regular dialysis should adhere to prescribed schedule and should not miss their Dialysis sessions to avoid any emergency dialysis.

The document provides General Guidelines for dialysis unit, dialysis patients and disinfection and disposal practices in dialysis unit. Guidelines are for hemo-dialysis and peritoneal dialysis.

[Source 03: Ministry of Health & Family Welfare on 7<sup>th</sup> April 2020](#)

### **Guidance document on appropriate management of suspect/ confirmed cases of COVID 19**

A series of measures have been taken by both the Central and State Governments to break the chain of transmission. One among these is to isolate all suspect and confirmed cases of COVID-19. However, as the number of cases increases, it would be important to appropriately prepare the health systems and use the existing resources judiciously. Available data in India suggests that nearly 70% of cases affected with COVID-19 either exhibit mild or very mild symptoms. Such cases may not require admission to COVID-19 blocks/ dedicated COVID-19 hospitals. It is important to put in place mechanisms for triaging and decisions making for identification of the appropriate COVID dedicated facility for providing care to COVID-19 patients.

The purpose of this document is to put in place such SOPs to ensure optimal utilization of available resources and thereby providing appropriate care to all the COVID-19 patients. This will ensure that available hospital beds capacity is used only for moderate to severe cases of COVID-19. The SOPs specified hereafter also Specify the different types of facilities to be set up for various categories of Covid-19 cases.

**Railways meet half initial target in a quick time**

In order to supplement the national efforts in combating COVID 19, Indian Railways has put all its might and resources behind national efforts. In a short span of time, it has achieved almost half the initial task of 5,000 coaches by being able to convert 2,500 coaches. With the conversion of around 2,500 coaches, 40,000 isolation beds are now ready for contingency

**DST supported healthcare startup developing rapid test for detection of COVID-19**

The Department of Science & Technology has funded 'Module Innovations', a Pune based healthcare startup working on point of care diagnostics to build up on its platform technology for rapid diagnosis of diseases to develop a product for detecting COVID 19 with a 10 to 15 minute test.

Using the proven concept from its flagship product USense, Module is now developing nCoVSENSEs (TM) which is a rapid test device for detection of antibodies that have been generated against the COVID 19 in the human body.

**[Source 07: Ministry of Science & Technology, PIB ID: 1611604 on 6<sup>th</sup> April 2020](#)**

**Check urgently the virus of misinformation on COVID-19: Vice President**

Vice President of India, Shri M Venkaiah Naidu has described the spread of misinformation, especially on social media, as a "virus" that needs to be checked.

Superstitions and hearsay cannot be allowed to weaken our assault on Novel coronavirus. He stressed on the need for understanding among all religious groups that social distancing norms cannot be taken lightly. Finally, Safety of the front-line warriors, especially medical professionals, is absolutely essential.

### **Guidelines for Quarantine facilities**

This document provides guidelines for setting up of quarantine facilities during the current COVID-19 outbreak. The scope of this document is to cover the procedures required for

- Physical infrastructure/Functional Services requirement at quarantine facilities
- Procedure for medical monitoring of contacts, reporting formats
- Protocol for referrals of suspects/ Symptomatic and isolation of symptomatic if required temporarily
- Infection control practices by medical personnel, supporting staffs and catering staffs etc.

**[Source 09: Ministry of Health and Family Welfare, NCDC on 5<sup>th</sup> April 2020](#)**

### **Advisory on use of Homemade Protective Cover for Face & Mouth**

We are aware that social distancing and personal hygiene are keys to prevent COVID 19 infections. Certain countries have claimed benefits of homemade face cover for the general public. Such homemade face cover is a good method for maintaining personal hygiene. Such usage certainly will help in maintaining overall hygienic health conditions.

Therefore, it is suggested that such people who are not suffering from medical conditions or having breathing difficulties may use the handmade reusable face cover, particularly when they step out of their house. This will help in protecting the community at large.

This face cover is not recommended for either health workers or those working with or in contact with COVID 19 patients or are patients themselves as these categories of people are required to wear specified protective gear.

**[Source 10: Ministry of Health and Family Welfare, PIB ID: 1610960 on 4<sup>th</sup> April 2020](#)**

### **Advisory to start rapid antibody-based blood test for COVID-19**

Government of India has issued advisory to start rapid antibody based blood test for COVID-19 for areas reporting clusters (containment zone) and in large migration gatherings/evacuees centers.

All symptomatic Cases of Influenza Like Illness (ILI) in above areas to be tested at facility using rapid antibody tests. Any surge in cases to be brought to the notice of Surveillance Officer/CMO for additional investigation. All symptomatic ILI persons should be advised home quarantine for 14 days.

### **MHA writes to States/UTs to take measures to fight Fake News in order to prevent Panic among People and spread of COVID-19 in India**

Secretary, Union Ministry for Home Affairs (MHA), has written to all States/UTs to take effective measures to fight Fake News. It has been communicated that the Government of India is creating a web-portal for

people to verify facts and verified news promptly. States/UTs have been requested to create a similar mechanism at their level for issues relating to them.

**[Source 13: Ministry of Home Affairs, PIB ID 1610146 on 2<sup>nd</sup> April 2020](#)**

### **Parcel Trains providing big boost to transportation of essential commodities**

Indian Railways has planned 10 routes for Time Tabled Parcel Trains and tentative 18 new routes are planned for Special Parcel Trains to keep supply chains running

So far, Indian Railways has loaded 30 Special Parcel Trains to various destinations all over the country Indian Railways has also been running Parcel trains for Milk and Food Products as per demand of customers Railways all geared up to meet the demands of State Governments for Parcel Trains for short distance movement within the State Staff Manning these operations braving all challenges in COVID 19 lock down times to ensure citizens don't feel shortage of essential goods.

**[Source 14: Ministry of Railways, PIB ID 1610205 on 2<sup>nd</sup> April 2020](#)**

### **PM interacts with CMs to bolster efforts to tackle COVID-19**

Prime Minister outlined that the common goal for the country is to ensure minimum loss of life. In the next few weeks, testing, tracing, isolation and quarantine should remain the areas of focus. He highlighted the necessity of maintaining supply of essential medical products, availability of raw material for manufacture of medicines and medical equipment. He said it is necessary to ensure availability of separate, dedicated hospital facilities for COVID-19 patients. To increase the availability of doctors, he asked the States to tap into the resource pool of AYUSH doctors, organize online training and utilize para-medical staff, NCC and NSS volunteers.

Prime Minister further said it is pertinent to maintain peace and law & order across the country. He added that COVID-19 has attacked our faith and belief and is threatening our way of life. He appealed to the leaders to reach out to community leaders and social welfare organizations at state, district, town and block levels to build up a united front based on community-approach in the battle against the pandemic.

**[Source 15: Prime Minister's Office, PIB ID 1610246 on 2<sup>nd</sup> April 2020](#)**

### **Dr. Harsh Vardhan visits Dr. RML and Safdarjung Hospitals**

The Union Minister for Health & Family Welfare, Dr. Harsh Vardhan today visited Dr. RML and Safdarjung Hospitals to personally take stock of preparedness to overcome COVID-19.

After having inspected the working of these centers, the Health Minister expressed satisfaction over the pace of screening process. Keeping in view the emerging requirement of isolation beds, Dr Harsh Vardhan stated that the Trauma Center at Dr RML Hospital will function as dedicated COVID-19 isolation ward.

Saluting the committed and focused hard work of the doctors, and other healthcare professionals in the country, he stated that the country is proud of our dedicated health professionals.

**[Source 16: Ministry of Health and Family Welfare, PIB ID 1610703 on 2<sup>nd</sup> April 2020](#)**

### **Railways ramps up in in-house production of masks and sanitizers**

In continuation of the measures taken to prevent the spread of COVID-19, Indian Railways is making all out efforts to supplement the health care initiatives of Government of India. In this direction Indian Railways is producing Masks and Sanitizer in-house in its all Zonal Railways, Production Units and PSUs.

Till 1st April 2020 Indian Railways has produced total 287704 nos. of masks and 25806 liters of sanitizer in its Zonal Railways, Production Units and PSUs.

[Source 17: Ministry of Railways, PIB Release ID 200961 on 2<sup>nd</sup> April 2020](#)

### **Updates on COVID-19**

Various actions have been initiated by Government of India along with the States/UTs for the prevention, containment and management of COVID-19 in the country. These are being regularly monitored at the highest level.

Hon'ble President of India Shri Ram Nath Kovind discussed the status of preparedness, the role of civil society/voluntary organisation/private sector and the role of the Red Cross with focus on vulnerable sections to contain the spread of the COVID-19 in a video conference.

Hon'ble Prime Minister Shri Narendra Modi, while addressing the nation today morning, appreciated that the country has shown unprecedented discipline and collective spirit during these uncertain times of crisis. He reiterated the importance of Social Distancing and urged every citizen to help implement the lockdown.

Dr. Harsh Vardhan, Union Minister of Health and Family Welfare appealed to the patients and their families, not to create hurdles in the work of doctors and other health workers.

### **MHA writes to States to widely publicize the Penal Provisions regarding Violations of Lockdown Measures to fight COVID-19**

Union Home Secretary has written to all States to widely publicize among the authorities and public, the penal provisions under the DM Act and IPC regarding violations of lockdown measures, to fight COVID-19. It has been stressed that strict action must be taken by authorities on violators of lockdown measures.

[Source 28: Ministry of Home Affairs, PIB ID 1610308 on 2<sup>nd</sup> April 2020](#)

### **MHA requests States/UTs to implement Lockdown Measures in Letter and Spirit to fight COVID-19**

Union Ministry for Home Affairs (MHA) had issued consolidated guidelines on lockdown measures to be taken by the Ministries/Departments of Government of India and States/UTs Governments/Administrations, so as to break the chain of transmission of the COVID-19 in the country.

It was observed that some States/UTs are allowing exceptions beyond what has been permitted under lockdown measures, as contained in Consolidated Guidelines issued by MHA under DM Act 2005.

In pursuance of this observation, Union Home Secretary, has written to all State Chief Secretaries and UT Administrators requesting them to strictly implement lockdown measures in letter and spirit, by exercising their powers under the Disaster Management Act, 2005, to fight COVID-19.

### **Guidelines on disinfection of common public places including offices**

The corona virus even though survives on environmental surfaces, gets easily inactivated by chemical disinfectants. Environmental cleaning /decontamination of common places like indoor areas, outdoor areas and public toilets are essential in areas reporting COVID-19.

The Indoor areas including office spaces should be sanitized every evening after office hours or early in the morning before the rooms are occupied with proper use of protective equipment by the worker.

Outdoor areas have less risk than indoor areas due to air currents and exposure to sunlight. These include bus stops, railway platforms, parks, roads, etc. Cleaning and disinfection efforts should be targeted to frequently touched/contaminated surfaces.

Sanitary workers must use separate set of cleaning equipment for toilets (mops, nylon scrubber) and separate set for sink and commode). They should always wear disposable protective gloves while cleaning a toilet.

The Guidelines also highlights Personal Protective Equipment (PPE) use by Sanitary workers, preparation of 1% sodium hypochlorite solution.

[Source 63: MoHFW guideline dated 29.03.2020](#)

### **Standard Operating Procedure (SOP) for transporting a suspect/ confirmed case of COVID-19**

This SOP is applicable to current phase of COVID-19 pandemic in India (local transmission and limited community transmission), wherein as per plan of action, all suspect cases are admitted to isolation facilities. These procedures are meant to guide and be used for training ambulance drivers and technicians in transporting COVID-19 patients. The cleaning and decontamination protocols given here in the guidance note need to be strictly followed.

All surfaces that may have come in contact with the patient or materials contaminated during patient care (e.g., stretcher, rails, control panels, floors, walls and work surfaces) should be thoroughly cleaned and disinfected using 1% Sodium Hypochlorite solution

The 102 ambulances should not be used for corona patients and should only be used for transporting pregnant women and sick infants.

[Source 64: Ministry of Health and Family Welfare \(DGHS-EMR\) dated 29.03.2020](#)

### **Health advisory for elderly population of India during COVID-19**

Elderly people are at a higher risk of COVID-19 infection due to their decreased immunity and body reserves, as well as multiple associated comorbidities like diabetes, hypertension, chronic kidney disease and chronic obstructive pulmonary disease. Also, course of disease tends to be more severe in case of elderly resulting in higher mortality.

Elderly persons are advised to stay at home, take proper nutrition, take prescribed medicines regularly, follow proper hygiene and monitor health. In case of any new problem consult doctor or call helpline.

**MoHFW- Guidelines on rational use of Personal Protective Equipment (PPE)**

Personal Protective Equipment (PPE) guidelines describes components of PPE are goggles, face-shield, mask (Triple layer medical mask and N-95 Respirator mask), gloves, coverall/gowns (with or without aprons), head cover and shoe cover along with their specifications.

The PPEs are to be used based on the risk profile of the worker at different settings like immigration counters, customs and airport security, isolation facility of APHO, hospital setting, in-patient services and emergency department.

Doctors, nurses & other health staff working in ICU, attending to severely ill patients and in laboratories are exposed to high risk and should protect themselves with full complement of PPE. Doctors/ nurses during interview & clinical examination in holding area/ Isolation facility of APHO/ PHO are exposed to moderate risk and will require N-95 mask. Whereas persons working at Immigration Counters, customs and airport security are exposed to lower risk and a triple layer mask may be sufficient to protect them.

It also emphasizes that PPEs are not alternative to basic preventive public health measures such as hand hygiene, respiratory etiquettes; maintaining a distance of at least 1 meter and following the laid down protocol for disposing off PPEs which must be followed at all times.
